Creating Your Society

Session Overview

In this session you will create the society you created last session in Minecraft. In the next session you will need to showcase your society to other groups and will have the chance to explore other groups' societies as well.

Learning Objectives

By the end of this session you should: -

- Have created your society within Minecraft.
- Begin preparing to showcase your society to other groups.

Creating Your Society

Creating Your Society

- During this session you will create your society within Minecraft.

- The reason for creating your society in Minecraft is to be able to showcase your society to other groups in a 'Societies Fair' that will take place in the next session.

- When creating your society remember to think about how your creation will help you in showcasing your society to other groups.

- Remember you only have the duration of this session to create your society in Minecraft.

ExtraChallenge

Including Interactivity

- Some societies during a society fair will include interactive elements that help students understand what it is that their society does.

- Add an interactive element to your creation that will allow the other groups to better understand what your society does.

Wrapping Up

Learning Objectives Revisited

You should now: -

- Have created your society.
- Be prepared to showcase your society to other groups in the next session.
